SUMMARY

Senior Android Developer with over 7 years of hands-on experience in designing, developing, and deploying scalable mobile applications in the fintech and e-commerce domains. Proven expertise in Kotlin and Java, with a strong focus on clean architecture, performance optimization, and secure code practices. Adept at leading cross-functional teams, driving end-to-end project delivery, and collaborating with stakeholders to align technical solutions with business goals. Seeking to contribute my technical acumen and leadership skills to a forward-thinking organization committed to delivering impactful and innovative mobile experiences.

SKILLS

Android SDK		GitHub	Firebase	Java	Jetpack (Compose / Work Manager / Room / Navigation Components)					JIRA	
JSON	Kotlin	MVC	MVVM	Payment Integration		XML	SQLite	Retrofit	Agile	Git	REST API
OOP	Hilt	Crashlytics	Unit Testing		One Signal	Biometric Authentication		Clean Architecture			
Hardware Integration (PAX / Printers / Scanners)					Agile/Scrum						

PROJECTS

JS Mobile – Digital Banking App

<https://play.google.com/store/apps/details?id=com.JSBL.bank>

Contribution:

- Developed secure login, biometric authentication, and key modules like mutual funds and fund transfer, enabling users to manage investments and transfer funds seamlessly
- Provided application support, investigating and resolving production issues including crashes, transaction failures, and performance bottlenecks
- Instant access to account balances, statements, and transaction history
- Fund transfers via IBFT and within JS Bank
- Built for speed, simplicity, and security using Kotlin, MVVM, and RESTful APIs

BANK ISLAMI - Digital Banking App

<https://play.google.com/store/apps/details?id=com.bi.digitalbanking>

Contribution:

- Provided ongoing support for the android application, handling bug fixes and performance tuning
- Monitor and respond to production issues related to Android applications
- Work closely with QA, DevOps, and development teams to replicate and fix reported issues

JAGAH ONLINE

Contribution:

- Built user-facing features for property listings, supporting image uploads and detailed descriptions to enhance listing visibility
- Implemented property search and filters with dynamic UI using MVVM architecture and LiveData
- Developed favourites and saved searches feature using Room database for offline access
- Executed Network International, Stripe and Jazz cash payment integration for e-commerce

TONY'S 8 MINUTES

Contribution:

- Involved in all phases of mobile application development, ensuring seamless delivery from concept to production
- Added exercise video tutorials with local caching for offline access
- Developed a calendar view to track workout history and user progress
- Applied a countdown feature for each of the 8-minute sessions, along with progress tracking on calendar

LINKED UNION SCANNER

<https://play.google.com/store/apps/details?id=com.lu.scanner>

Contribution:

- Improved app functionality by integrating a seamless barcode scanning feature to enhance user experience and data input
- Created an event for union members. If a union member exists, it takes attendance just by an easy click on the bar code
- Implemented real-time attendance recording, syncing scans to backend systems
